Moodle is an open source online learning platform that is being used by schools, universities and training institutions around the world. Many schools are using Moodle to support curriculum delivery and assessment.

To support and encourage South Australian teachers in the effective use of Moodle a practitioner based symposium is being held on Saturday June 1st. Presentations, workshops and discussions are being offered to support teachers and schools that are currently using Moodle and want to take the next step, or those that have heard of Moodle and want to jump on board. This day, which will focus on 21st century pedagogy, will feature Five Minute Moodles (SpeedShare sessions), 25 minute Presentations and 45 minute Workshops.

This is a collaborative event Moodle Presentations and Moodle Workshops offered by practitioners for practitioners supporting teachers and school leaders to deliver 21st century learning methodologies.

Program details available from CEGSA or contact: harry.postema@gihs.sa.edu.au
Registrations close Monday May 27th.
